Ask the Motor Medics®

Automotive Advice from The Under the Hood® Show

Dear Motor Medics,
There's smoke coming from near my steering wheel at times right out of the column. It's not a lot of smoke but I can see it and smell it and it scares me. All my vehicle systems seem to be working fine now but a few months ago my turn signals were acting up. The car is a 2001 Buick Regal. Is this something I should be concerned about or can I let it go?

Robert in Sheldon Iowa

Dear Robert,
Your car is smoking... There is no way we would let that go without a thorough check out for safety. Without seeing the car hands-on it's hard to say but we have seen smoke generated in this way due to failing turn signal switches. The switch can fail simply because it is old or it can be stressed by things like shorted wiring, failed bulbs or adding an extra load to the system such as a trailer which has an added load of extra lighting that has to be carried by the cars wiring. The first step will be verifying where the smoke is coming from. That will require someone experienced with the system to open it up and inspect the parts. If any parts are found to be burnt they will need to be repaired then the rest of the effected system will need to be diagnosed to make sure that what caused the first failure does not happen again.

Take care, The Motor Medics

Dear Motor Medics,
I listen to your Under The Hood radio show here in Branson almost every week and you guys have some of the most useful car advice I have ever found, and it's free which is the best kind in my book. I read your column each week too and a while back you had talked about readers car that had a fueling issue. When the car was being filled with gasoline it would not fill quickly, it would fill for a few seconds then click off the pump and it would do this over and over again. My 2008 Impala is doing this now. What was it and could it be the same thing with my car?

Doug in Branson Missouri

Dear Doug,
It is common on many cars especially GM cars and trucks to have this happen and it is often caused by a failure in what is called the evaporative emissions system. The fuel system is a closed system which prevents fuel from evaporating into the atmosphere which would cause pollution and also be a waste of your money as your fuel would simply disappear over time. The system does need to vent at times for things like filling the tank and also when fuel is being consumed by the engine or it would back up like yours does. Also, in the case of the engine using fuel the tank would eventually collapse. This is just one possible problem.

Take care, The Motor Medics

Communicate with the city

City of Brandon utilizes a text messaging service to keep the public in the know. To sign up for this service, text "Brandon" to 33222 for notification of snow alerts, water conservation alerts, water main breaks, street closures, etc.

Text "Brandonpool" to 33222 for pool opening and closing dates, closures due to weather, etc.

When registering, auto correct tends to add a space. Subscribers to this service will receive a return message saying, "Welcome to..."

To register, type 33222 in the text message as the number and then type the "Key-
