Ask the Motor Medics®

Automotive Advice from The Under the Hood® Show

Dear Motor Medics,

I'm looking at several cars in the two year old range with around 10k miles and after deciding on all the features that I like about each one I think I have come down to two of them and they are both the same model but one has a 4 cylinder engine and the other a six. Both vehicles have automatic transmissions and have very similar features and I would like the best possible fuel mileage so I'm leaning heavily towards the 4cylinder but I'm not sure if that's the right choice. Do 4 cylinder model cars always get better mileage than a six cylinder?

Scott in Larchwood Iowa

Dear Scott,

You are correct in not assuming that a 4 cylinder car always gets better fuel mileage because they don't. Often a 4 cylinder car is either too heavy to efficiently pull the load of the car and it lugs trying to move it which lowers the economy, or the car is geared lower than the six so that it can make up for lost power which also cuts down fuel mileage. We suggest that you look at consumer reports and look online for real world fuel mileage reports from folks who have driven the models you are looking at and compare before you buy. You may find the six cylinder is the better choice but not always. Researching any vehicle you buy is always imperative before making a car buying decision.

Take care, The Motor Medics

Dear Motor Medics,

My car recently suffered a lot of hail damage in a storm and I have been working with my insurance company to get the matter resolved. They want to replace things like the hood and trunk and a fender with a salvage yard part which matches correctly according to them and on the roof they want to do painless dent repair. My car is ten years old and has full coverage and with only 70k miles I want it fixed but I want all new parts and paint but they say they don't have to provide that, they say they just have to make it look like it did before the damage. Do salvage yard parts look as good as my old ones and can they really take out dents with no painting?

Dan in Sioux City Iowa

Dear Dan,

That is really low miles for the age and we can understand your concern. If like kind and quality parts are needed for a repair a auto recycler is often the place the insurance companies will turn to as a source. These places carefully inspect their inventory and will help to supply them with the part that matches exactly and sometimes they don't even need paint if the finish is as good as the car they are going on and the color is a match. As for the painless dent removal, it can be done carefully by a skilled painless dent technician.

Take care, The Motor Medics
